### **About Vera Therapeutics**

Vera Therapeutics is a clinical-stage biotechnology company focused on developing and commercializing transformative treatments for patients with serious immunological diseases. Vera's lead program is atacicept, a fusion protein that is in development for IgA nephropathy, a disease with high unmet medical need and no approved therapies. In addition, Vera is evaluating additional diseases where atacicept's reduction of autoantibodies may prove medically useful, including lupus nephritis (LN), a severe renal manifestation of systemic lupus erythematosus (SLE).
