

Vera Therapeutics Reports Inducement Grants Under Nasdaq Listing Rule 5635(c)(4)

July 5, 2024

BRISBANE, Calif., July 05, 2024 (GLOBE NEWSWIRE) -- Vera Therapeutics, Inc. (Nasdaq: VERA) today announced that on July 1, 2024, the Compensation Committee of Vera's Board of Directors granted inducement awards consisting of a non-qualified stock option to purchase 160,000 shares of Class A common stock to David Johnson, Vera's new Chief Operating Officer, under Vera's 2024 Inducement Plan. Vera also announced that on July 2, 2024, the Compensation Committee granted additional inducement awards consisting of a non-qualified stock option to purchase 139,100 shares of Class A common stock and restricted stock units (RSUs) for 61,925 shares of Class A common stock to ten new employees under the Inducement Plan. The Compensation Committee approved the awards as an inducement material to the new employees' employment in accordance with Nasdaq Listing Rule 5635(c)(4).

The stock option granted on July 1, 2024 has an exercise price per share equal to \$36.29, Vera's closing trading price on July 1, 2024. The stock option granted on July 2, 2024 has an exercise price per share equal to \$34.93, Vera's closing trading price on July 2, 2024. Each stock option will vest over four years, with 25% of the underlying shares vesting on the first anniversary of the applicable vesting commencement date and the balance of the underlying shares vesting monthly thereafter over 36 months, subject to the new employee's continued service relationship with Vera through the applicable vesting dates. Each of the RSUs will vest over four years, with 25% of the underlying shares vesting on each anniversary of August 20, 2024, subject to the new employee's continued service relationship with Vera through the applicable vesting dates. The awards are subject to the terms and conditions of the Inducement Plan and the terms and conditions of an applicable award agreement covering the grant.

About Vera

Vera Therapeutics is a late clinical-stage biotechnology company focused on developing treatments for serious immunological diseases. Vera's mission is to advance treatments that target the source of immunological diseases in order to change the standard of care for patients. Vera's lead product candidate is atacicept, a fusion protein self-administered as a subcutaneous injection once weekly that blocks both B-cell Activating Factor (BAFF) and A Proliferation-Inducing Ligand (APRIL), which stimulate B cells and plasma cells to produce autoantibodies contributing to certain autoimmune diseases, including IgAN, also known as Berger's disease, and lupus nephritis. In addition, Vera is evaluating additional diseases where the reduction of autoantibodies by atacicept may prove medically useful. Vera is also developing MAU868, a monoclonal antibody designed to neutralize infection with BK virus (BKV), a polyomavirus that can have devastating consequences in certain settings such as kidney transplant. Vera retains all global developmental and commercial rights to atacicept and MAU868. For more information, please visit www.veratx.com.
