

## Vera Therapeutics Announces Proposed Public Offering of Class A Common Stock

October 28, 2024

BRISBANE, Calif., Oct. 28, 2024 (GLOBE NEWSWIRE) -- Vera Therapeutics, Inc. ("Vera"), a late clinical-stage biotechnology company focused on developing and commercializing transformative treatments for patients with serious immunologic diseases, today announced its plans to commence a public offering, subject to market and other conditions, to issue and sell \$300.0 million of shares of its Class A common stock. All of the shares are being offered by Vera.

In connection with the proposed offering, Vera expects to grant the underwriters a 30-day option to purchase up to an additional 15% of the shares of Class A common stock sold in the public offering. There can be no assurance as to whether or when the proposed offering may be completed or as to the actual size or terms of the proposed offering.

J.P. Morgan, Goldman Sachs & Co. LLC, Evercore ISI and Cantor are acting as joint book-running managers for the proposed offering.

The proposed offering is being made pursuant to an automatic shelf registration statement on Form S-3, including a base prospectus, that was filed with the Securities and Exchange Commission (the "SEC") on October 28, 2024 and became effective upon filing. A preliminary prospectus supplement and accompanying prospectus relating to the proposed offering will be filed with the SEC and will be available for free on the SEC's website located at <http://www.sec.gov>. ### About Vera

Vera is a late clinical-stage biotechnology company focused on developing treatments for serious immunological diseases. Vera's mission is to advance treatments that target the source of immunological diseases in order to change the standard of care for patients. Vera's lead product candidate is atacept, a fusion protein self-administered as a subcutaneous injection once weekly that blocks both B-cell activating factor (BAFF) and A proliferation-inducing ligand (APRIL), which stimulate B cells and plasma cells to produce autoantibodies contributing to certain autoimmune diseases, including IgAN, also known as Berger's disease, and lupus nephritis. In addition, Vera is evaluating additional diseases where the reduction of autoantibodies by atacept may prove medically useful. Vera is also developing MAU868, a monoclonal antibody designed to neutralize infection with BK virus (BKV), a polyomavirus that can have devastating consequences in certain settings such as kidney transplant. Vera retains all global developmental and commercial rights to atacept and MAU868.

### Forward-looking Statements

Statements contained in this press release regarding Vera's expectations regarding the offering are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based upon Vera's current expectations and involve assumptions that may never materialize or may prove to be incorrect. Actual results could differ materially from those anticipated in such forward-looking statements as a result of various risks and uncertainties, which include, without limitation, market conditions and satisfaction of customary closing conditions related to the proposed public offering. All forward-looking statements contained in this press release speak only as of the date on which they were made and are based on management's assumptions and estimates as of such date. Vera undertakes no obligation to update such statements to reflect events that occur or circumstances that exist after the date on which they were made, except as required by law.
